

GET A GRIP ON GLOVE SELECTION

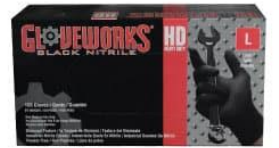

A COMPARISON OF PREMIUM GLOVES

GLOVEPLUS BLACK NITRILE GLOVES
Over 50% thicker than standard nitrile gloves with excellent dexterity

5 mil
ADDED THICKNESS
Enhances puncture resistance

GLOVEWORKS HEAVY DUTY BLACK NITRILE GLOVES
Aggressive diamond texture with the enhanced dexterity of a lighter weight glove

6 mil
HEAVY DUTY THICKNESS
Provides further protection from harsh chemicals

GLOVEWORKS HEAVY DUTY ORANGE NITRILE GLOVES
Extra heavy duty thickness with an aggressive diamond texture and high visibility orange color

8 mil
HEAVY DUTY EXTRA THICKNESS
Stands up to those chemicals even longer

TEXTURE

ENHANCED TEXTURE
Increases gripping power in wet and dry conditions with enhanced texture on the fingertips

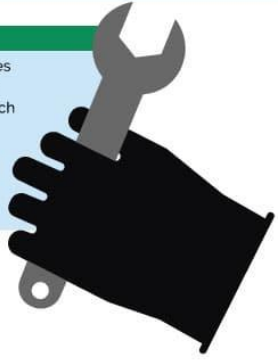

RAISED DIAMOND TEXTURE
Raised texture on both sides
Over 3000 diamonds per glove
60% more surface area
Aggressive texture enables greater surface contact
Diamonds allow more liquid to pass through channels

COLOR

PROFESSIONAL BLACK
Stands up to chemicals, greases and solvents, but still provides a professional appearance which hides dirt, grease and grime
Black is the most popular color in automotive and industrial applications

HIGH VISIBILITY ORANGE
Excellent part of PPE
Leads to higher compliance as it is easier for safety directors to see from a distance
Workers less likely to be injured
